

# VIRTUAL SERIES

## SESSION 1:

# Understanding the Medical Home

**JANUARY 24<sup>TH</sup> FROM 12-1:30PM VIA ZOOM**

Login details and instructions will be sent by email once registered.

### About this virtual event:

This educational event will share useful information on the medical home and care notebook creation and utilization. Understanding a Medical Home is an important component for those with special medical and health care needs.

A medical home builds partnerships with clinical specialists, families, and community resources. The medical home recognizes the family as a constant in a child's life and emphasizes partnership between health care professionals and families.

A care notebook will help you keep everything important organized and easy to find, especially in an instance where your medical home information is not stored on an app or virtual space. The care notebook will give caregivers the information needed to best take care of your child in various settings and life experiences, including times of transition and even emergencies.

Attend this event to grow your understanding of the medical home and care notebook!

### Objectives:

- Define a medical home and learn important components of a medical home
- Understand how to create/build a medical home for your family member or loved one
- Learn to utilize a care notebook in various settings and stages of life
